👤 PROFILE

Ambitious Computer Science student skilled in **software development** and full-stack web development. Experienced in **Django, JavaScript, Python**, and passionate about blending cultural heritage with modern tech. A proactive learner eager to contribute to innovative projects.

📁 PROJECTS

Gregorian to Ethiopian Calendar Converter App

Utilized Python for backend calculations and JavaScript for the user interface.

Quiz About the Axumite Kingdom

Implemented dynamic question generation using JavaScript and stored quiz results in a local SQL database.

Inventory Management System

Implemented features for tracking stock levels, managing orders, and generating reports.

Personal Portfolio Website

Implemented using HTML, CSS, and JavaScript, with a focus on modern web design principles.
